

2016 INTERMOUNTAIN GIS CONFERENCE

FOCUS ON EDUCATION

April 4th - 7th, 2016, Great Falls

Keynote speaker, Joseph Kerski, PhD, will kick off the conference with a focus on GIS Education

WORKSHOPS *(Tuesday)*

Workshop: Telling Your Story with ESRI Storymaps

Join Geographer and Education Manager Joseph Kerski as we examine the benefits for using ESRI Story Maps web mapping applications to communicate the results of your own GIS project to a broad range of constituents. Story maps are a powerful multimedia web mapping set of tools and data that can serve as a means of rich communication but also are easy to create and modify.

Workshop: Spatial Analysis with ArcGIS Online

You may use ArcGIS Online for its rich array of basemaps and thematic layers for your GIS projects, but did you also know that it contains a growing and powerful set of spatial analysis tools? Joseph Kerski leads this workshop to explore how to analyze data spatially efficiently and quickly in ArcGIS Online for natural resource management, human health, planning, law enforcement, and other fields, using map overlay, routing, proximity, spatial statistics, and more.

There's also the **EDUCATION TRACK**
and a **LUNCHTIME PRESENTATION**
on Wednesday

*The costs of each workshop is only \$20 for students.
Register for Wednesday's Education Track and
lunchtime presentation is an additional \$37.*

ESRI's Joseph Kerski, PhD
