

**2016 Esri GeoDev Meetup
at the Intermountain GIS Conference
In Great Falls, MT at April 4th at 5:30 pm
Location: Best Western Heritage Inn**

CALL FOR LIGHTNING TALKS

The GeoDev Meetup is a "technical social" where developers can meet and discuss all things geospatial, geolocation, spatial analysis, and GIS. Developers and non-developers of all levels of expertise are welcome. It's free! We've got food and drinks for you, a bunch of Esri swag, and raffles too.

The event will include:

- Networking Social
- Presentation by Esri
- Lightning Talks

A **lightning talk** is a very short presentation lasting only a few minutes (5 minute time limit). Several lightning talks by different speakers are then delivered to an audience with a slideshow to present. The slides are often automated to a fixed interval to speed the presentation along.

The lightning talk portion of the event will be put on by the interested attendees. In order to participant, please submit a short abstract by **Friday, March 25th at 5pm.**

Send your submissions to Curtis DeVault (MAGIP's Technical Committee Chair) at cdevault@pioneer-technical.com. For questions or additional information feel free to call Curtis at (406) 723-1998 or [click here to RSVP](#).
